(54) Title: A METHOD AND SYSTEM FOR INCLUDING LOCATION INFORMATION IN A USSD MESSAGE BY A NETWORK NODE

(57) Abstract: The present invention relates to a method of providing a location specific service in a digital cellular communication network using unstructured supplementary service data. In the method, the service data is sent to a network node of said network by at least one mobile station, and the service is dependent of location information of said at least one mobile station. Said method comprises a step of including location information in said service data by said network node. The invention is further related to a network node for use with a method as described here.
